

WOODVIEW PARK-

This 3.5 Acre Park is located on Woodview Avenue and is one of the more scenic areas the village maintains. The park's most unique feature is that it borders the 18-mile creek (with a small dam) to the very south of the park. The parkland slopes to the edge of the water, and the opposite side of the water is walled up by a high rim of a slate bank, creating a canyon effect. The park is developed in the front two-thirds with a back stop (appropriate for kickball and wiffle ball only), a half basketball court, picnic tables, and playground apparatus. The slope to the creek forms a natural sledding and inner-tube location in the winter.

Looking at Eighteen Mile Creek from atop the hill.
