the way it does!

The Village of Hamburg

... is hosting a **PUBLIC WORKSHOP** for its...

Zoning Code Update Project

Wed, March 27th - 6:30PM

The Village of Hamburg is updating its Zoning Code (Chapter 250) to ensure compatibility with current community development preferences and to improve clarity and understanding of the regulations for all users. This zoning update is also intended to make sure the Zoning Code is consistent with the Village's overall vision as outlined in the adopted 2012 Comprehensive Plan. This Plan and the current Zoning Code may be found on the Village's webpage - www.villagehamburg.com.

The purpose of the Public Workshop will be to introduce the project team, provide an overview of the proposed code update process, and solicit resident and stakeholder input on the existing code. Attendees will also be given an opportunity to participate in a series of brainstorming activities to better understand local preferences with respect to land use and development character. Your input is needed to help inform this process. We hope to see you there!

**To be held in the Hamburg High School Cafeteria
(4111 Legion Drive, Hamburg, NY)**
